"Disorders, revolutions, economic convulsions and political upheavals do not happen. They result from planning. Under the surface, unknown to good people, there are constant plots, schemes, tricks and intrigues. Hidden forces continue their subterranean activities until they reach a boiling point, then an explosion takes place on the surface. The rank and file of people are caught off their guard. There comes a devastating outburst in which lives are lost, property is destroyed, and human development is retarded. Not until the storm breaks do the sleeping masses awaken, yawn, stir themselves and look about at the wreckage and carnage, after it is too late to help matters. History is replete with examples of this kind."

From "Adam Weishaupt, A Human Devil"¹

By Gerald B. Winrod

"It's easier to fool people than to convince them that they have been fooled."

Mark Twain

Alfred Witte

Alfred Witte was an outstanding German astrologer of the early 20th century and the founder of the Hamburg School of Astrology who wrote over 40 articles as well as the first "Rules for Planetary Pictures" . He was also a land-surveyor who worked on the Hamburg airport. In his private life he was an unpretentious, withdrawn man. He was married and had two daughters.

Witte began his career as an astrologer in 1913 when he published his article "Thoughts on Colour, Number, Tone" , where he developed the ideas of Johannes Kepler, his compatriot, an astrologer and mathematician, particularly on the idea of harmony or the music of the spheres. This article discussed the mutual interrelation of planets' vibrations, as well as their relation to other natural oscillations and waves according to the tuning fork principle.

Birth : 2 March 1878 at 21:12 LMT Hamburg, Germany.

The second Transneptunian-Planet Hades

By A. Witte

"Every astrologer is obliged, in a way, to collect his experiences in this regard and to share them with the readers of this magazine by publishing them, so that in the course of time, clarity about the effects of this yet unknown planet can be obtained."

Since this quote was written by Witte, as far as I know, no astrologer of the Hamburg School has published or conducted any research on Hades. Witte wrote that in 1924. The Hamburg School astrologers probably have the reasons for this. It is clear then in Witte's time were much more astrological researches than today. Nowadays astrology "researches" are similar to religious commentaries for the holy books.

If the people were not egoist and not inhuman, the conspiracies and conspirators would not succeed. Thomas Hobbes has already said it: "Man is the most dangerous enemy of man". (Homo homini lupus)

They will also achieve their goals this time as well, it is sure and this world can be forgotten. I only hope that next time I do not come to this world, even if this world is only an illusion.

Lexicon for Planetary Pictures² (p.333, Edition 1957, German):

Conspiracy : $\Upsilon = \text{♄} / \text{♅}$

Participating in a conspiracy : $\text{♄♅} = \text{♄} / \text{♅}$

In my opinion, we don't necessarily need to Υ (Ariespoint), so that it can be called a conspiracy. I think the sun-connection is more important than that.

We examine $\text{♅}, \text{♄♅}$ and ♄ connections.

On May 1, 1776, under the direction of the newly formed House of Rothschild (and Wessely, Moses, Mendelssohn; and the Bankers, Itzig, Friedlander, and Meyer), who instigated the American Revolution to weaken Great Britain, Weishaupt founded the Ancient Illuminated Seers of Bavaria, which became known as the Order of the Illuminati. Société des Trente

Adrien Duport , adviser to the Paris Parliament , founded in November 1788 a "constitutional club" whose members, in part from the Lodge of the nine sisters and that of the Social Contract known as the Coq-Héron , met at his hotel in the Grand-Chantier . Many of the members already belonged to the Society of Black Friends , a club founded by Brissot de Warville on February 19 , 1788 and assembled at the Hôtel de Lussan, rue Croix-des-Petits-Champs in Paris, by the Marquis de Condorcet who considered that the American Revolution was the harbinger of a "renewal of the Globe" and the abolition of the slavery. In the early days of its creation, the company which is a working committee from lodges in the Grand Orient of France , has no defined name, it is nicknamed "the meeting of Duport" or "the company reunited at Duport ". It did not take its name from "Société des Trente" until 1791.
